01 — Discovery

We draft the blueprint before we lay a single pixel.

Studio Arc designs and builds responsive digital interfaces — measured like architecture, tested like structure, and finished with warmth instead of sterile tech gloss.

0 Interfaces shipped

0 % Lighthouse accessibility avg.

0 Breakpoints, mastered

02 — Selected workBuilt to hold up at every size

Fieldnote

A mobile-first journaling app interface with fluid type and a single-column-first layout that expands into a two-pane desktop view.

HTML · CSS Grid · JS

Harbor Dashboard

A data dashboard shell using CSS Grid for the macro layout and Flexbox for every card's internal alignment.

CSS Grid · Flexbox

Northline Storefront

A clean, accessible storefront front-end with semantic landmarks that read cleanly for screen readers and search engines alike.

Semantic HTML5

03 — ProcessFrom blueprint to build

1. 01

Discovery

Define the "how might we" and the real constraints of the brief

1. 01

Discovery

Define the "how might we" and the real constraints of the brief.

2. 02

Wireframe

Grayscale, mobile-first. If it doesn't work without color, color won't fix it.

3. 03

Semantics

Header, nav, main, article, footer — the right landmark for the right job.
